SUMMARY

Dynamic Senior Frontend Engineer with 9 years of experience in leading design and development initiatives in the travel industry. Directed a team to redesign a booking engine, speeding up development by 35% and enhancing conversion rates by 40% through strategic React implementation. Seeking to join Crunchyroll as a Senior Frontend Developer to leverage skills in React.js and TypeScript for accelerated development and enhanced user experience.

EXPERIENCE

Senior Frontend Engineer

Collette Travel

October 2022 – Present, Rhode Island

- Directed frontend team of 4 engineers on booking engine redesign, accelerated development cycles by 35% through React component standardization and automated testing framework achieving 90% coverage.
- Built modular Sitecore component library with 20+ reusable elements, decreasing duplicate code by 45% and accelerating sprint velocity by 35%.
- Streamlined booking engine core functions through React/TypeScript implementation, reducing transaction processing time by 50% and increasing conversion rates by 40%.
- Decreased page load times by 40% through strategic code splitting, dynamic imports, and performance optimization techniques.
- Scaled navigation system across 3 international markets, processing 1000+ tours with real-time filtering and maintaining sub-100ms response times.
- Established cross-browser responsive design system meeting WCAG 2.1 AA standards, reducing development bottlenecks by 30% through automated accessibility testing.

Frontend Engineer

Thinkware

October 2020 – September 2022, Ohio

- Built Vue.js dashboard processing payroll for 5,000+ employees, cutting transaction times by 40% for 12 organizations.
- Created 20+ Vue.js components with REST API integration, maintaining 99.9% uptime and accelerating feature delivery by 50%.
- Automated deployment workflow reducing release time from 2 hours to 15 minutes through Jenkins pipeline optimization.
- Decreased JavaScript execution time by 30% across 20 web interfaces through bundle optimization and caching strategies.
- Enhanced user experience by implementing responsive design techniques with CSS3 and media queries, leading to a 25% increase in mobile user engagement across 10 digital platforms.

Full stack Developer

iMedia

August 2018 – June 2020, Boonton, NJ

- Built full-stack web applications for 20+ clients with 15 payment integrations, cutting transaction times by 40% at 99.9% uptime.
- Connected frontend-backend systems processing 1M+ daily API requests, reducing data sync errors by 85% through error boundary implementation.
- Optimized 100K+ lines of code through systematic review process, decreasing load times by 65% and doubling application speed.
- Created responsive interfaces for 30+ web applications, reducing bounce rates by 40% and increasing user session duration by 70%.
- Increased code reliability by 60% through React component testing framework with 95% coverage across critical features.

Full Stack Developer

Volum8

January 2015 – January 2018, Montgomery, NY

- Upgraded 30+ web properties to WCAG 2.1 AA standards, raising accessibility scores from 72% to 98% and cutting user complaints by 85%.
- Automated backup systems for 50+ domains maintaining 99.99% uptime, reducing recovery time from 4 hours to 30 minutes.
- Created 15+ responsive website templates accelerating project delivery by 40% and decreasing custom development needs by 50%.
- Automated 20+ monthly software releases through CI/CD optimization, cutting deployment time by 60% across all environments.

PROJECTS

Booking Engine Redesign

Collette Travel · January 2024 – December 2024

- Scaled React/TypeScript booking platform to 50K+ daily users, reducing cart abandonment by 40% through real-time pricing and inventory management.
- Built 30+ reusable Sitecore components decreasing development time by 50% across 12 device breakpoints.
- Automated testing protocols raising Lighthouse scores to 95+, cutting QA cycles by 45% while meeting WCAG 2.1 AA standards.
- Integrated 15+ REST APIs maintaining 99.9% uptime for payment processing and booking functions.
- Stack: React, TypeScript, Sitecore, Tailwind CSS, Jest, React Testing Library.

SKILLS

Frontend: React.js, Vue.js, Typescript, Javascript, HTML5, CSS3, SASS, Tailwind CSS, REST API, Redux

Frameworks: Next.js, Node.js, Express.js, GraphQL

Architecture: Component-Driven Development, Responsive Design, Progressive Web Apps, Mobile-First Design

Development Tools: Git, Webpack, Jest, React Testing Library, Jenkins CI/CD, Chrome DevTools, VS Code
