SUMMARY

Senior Frontend Engineer with 8+ years of experience delivering high-impact web solutions using React, JavaScript, and modern frontend technologies. Expertise in performance optimization and leading technical initiatives for enterprise applications.

EXPERIENCE

Senior Frontend Engineer

Collette Travel Service

October 2022 - Present, Rhode Island

- Spearheaded UX/UI design collaborations across 20+ projects, reducing design-to-development handoff time by 40% and increasing sprint completion rate by 35% through streamlined Figma workflows while maintaining 95+ Lighthouse scores across 12 device breakpoints.
- Engineered 30+ reusable React components integrated with Sitecore Experience Platform, reducing development time by 50% and improving code reusability by 75% through modern JavaScript frameworks and automated frontend workflows.
- Orchestrated backend team collaborations to integrate 15+ APIs with 99.9% uptime, while reducing QA cycles by 45% and deployment issues by 70% through comprehensive testing protocols achieving 90% code coverage.
- Led Agile/Scrum processes for 6 development teams (25+ members), improving sprint velocity by 40% and reducing deployment blockers by 60% through streamlined cross-functional collaboration.
- Modernized 100K+ lines of legacy code using ES6+ and TypeScript, reducing technical debt by 65% and improving application performance by 40% while implementing WCAG 2.1 AA compliance features that improved accessibility scores from 72 to 98.
- Architected headless CMS solutions supporting 50K+ daily users, improving content delivery speed by 60% and reducing content update time by 70% through optimized Sitecore modules and efficient content management workflows.
- Implemented Tailwind CSS in redesigning 20+ user interfaces, decreasing CSS churn by 80% and enhancing design consistency across platforms within a 6-month project timeline, yielding a 45% improvement in site load performance.
- Established design patterns for 30+ React components, accelerating feature rollout by 50% and enhancing code maintainability by adhering to best practice methodologies.

Frontend Engineer

ThinkWare Inc

October 2020 - September 2022, Ohio

- Developed Vue.js payroll dashboard serving 5,000+ employees, reducing processing time by 40% across 12 client organizations.
- Implemented 20+ modular Vue.js components and RESTful APIs, achieving 99.9% uptime and reducing feature development time by 50%.
- Streamlined deployment pipelines through CI/CD implementation, reducing deployment time from 2 hours to 15 minutes.
- Engineered lazy loading for Vue.js components, improving page load speeds by 35% across 15+ enterprise applications and enhancing user experience metrics.

Full stack Developer

iMedia

August 2018 - June 2020, Boonton, NJ

- Architected and maintained full-stack web applications for 20+ clients, integrating 15 third-party services and payment gateways while achieving 99.9% uptime and reducing transaction processing time by 40%.
- Engineered front-end components integration with backend architecture, processing 1M+ daily API requests with 99.9% success rate and reducing data sync errors by 85%.
- Executed comprehensive code reviews and implemented optimization techniques across 100K+ lines of code, resulting in 50% improved application performance and 65% reduced loading times.

Full Stack Developer

Volum8

January 2015 - January 2018, Montgomery, NY

- Implemented ADA compliance standards across 30+ web properties, achieving WCAG 2.1 AA compliance and increasing accessibility score from 72% to 98%, while reducing accessibility-related complaints by 85%.
- Managed critical infrastructure for 50+ domains, maintaining 99.99% uptime through automated backup systems and reducing disaster recovery time from 4 hours to 30 minutes.
- Developed and implemented 15+ responsive website templates, resulting in 40% faster project delivery and a 50% reduction in custom development requests from content teams.
- Coordinated the release of 20+ software deployments monthly, leveraging CI/CD pipelines to reduce deployment time by 60% and ensure consistent delivery of high-quality code releases across all environments.

SKILLS

ReactJS, Next.js, Redux, Zustand, jQuery, JavaScript (ES6+), TypeScript, HTML5, CSS3, XML, JSON

Sitecore Experience Platform (versions 8 and 9), RESTful and GraphQL APIs, Progressive Web Applications (PWAs)

Visual Studio 2022, Visual Studio Code, Sitecore Content Editor, Git, Chrome DevTools
